Improve Transfer of Federally-Funded Technologies from Lab-to-Market

Goal Leaders

**Walter G. Copan, Ph.D.**  
Under Secretary of Commerce for Standards and Technology  
Director, National Institute of Standards and Technology  
U.S. Department of Commerce

**Michael Kratsios**  
Deputy Assistant to the President for Technology Policy  
Office of Science and Technology Policy  
The White House
Challenge

- The Federal Government invests approximately $150 billion annually\(^1\) in research and development (R&D) conducted at Federal laboratories, universities, and other research organizations.
- For America to maintain its position as the global leader in innovation, bringing products to market more quickly, growing the economy, and maintaining a strong national security innovation base, it is essential to optimize technology transfer and support programs to increase the return on investment (ROI) from federally funded R&D.

Goal Statement

- Improve the transition of federally funded innovations from the laboratory to the marketplace by reducing the administrative and regulatory burdens for technology transfer and increasing private sector investment in later-stage R&D;
- Develop and implement more effective partnering models and technology transfer mechanisms for Federal agencies; and
- Enhance the effectiveness of technology transfer by improving the methods for evaluating the ROI and economic and national security impacts of federally funded R&D, and using that information to focus efforts on approaches proven to work.

Strategies

- Identify regulatory impediments and administrative improvements in Federal technology transfer policies and practices.
- Increase engagement with private sector technology development experts and investors.
- Build an entrepreneurial R&D workforce.
- Support innovative tools and services for technology transfer.
- Improve understanding of global science and technology trends and benchmarks.

---

**Goal Leadership**

**Office of Science and Technology Policy (OSTP)**

**CAP Goal Leadership**

**Department of Commerce (DOC)**

---

**National Science & Technology Council (NSTC)**

**Lab-to-Market Subcommittee (L2M SC)**

Co-Chairs: OSTP, NIST, DOE

*Coordinate, Review, and Implement Interagency Priorities*

---

**Small Business Innovation Research (SBIR) Program Managers Working Group**

**Interagency I-Corps Community of Practice**

**Interagency Working Group for Technology Transfer**

**Interagency Working Group for Bayh-Dole**

**Federal Laboratory Consortium for Technology Transfer**

---

**Interagency Contributors**

---

See [http://www.nist.gov/tpo/lab-to-market.cfm](http://www.nist.gov/tpo/lab-to-market.cfm) for descriptions of participating working groups

The Interagency Working Group for Bayh-Dole coordinates implementation of the Bayh-Dole Act; see 35 U.S.C. 200 and 37 C.F.R. 401 and 404.
Technology transfer thought leaders from across the Federal government will work with U.S. industry, entrepreneurs, universities, and other stakeholders to develop the strategy. Federal stakeholders will develop the action plan and track implementation through this CAP Goal.

**Current Status:** Short-term milestones have been developed; Discovery and Strategy Development phases will inform long-term goals and plans.

**Full Action Plan** will be developed with stakeholder input.

---

**Discovery**
- Develop an understanding of the as-is state, identify key internal and external stakeholder groups, and develop a clearly scoped problem statement.

**Strategy Development**
- Develop one or more high-level strategies to address each key issue identified in the problem statement. Strategies will make use of lessons learned from past and ongoing efforts.

**Options & Solutions**
- Analyze options and propose specific solutions to address each identified issue. Prioritize implementation actions and timelines.

**Develop Action Plan and Key Milestones**
- Develop Full Action Plan with implementation priorities, output and outcome metrics, and key milestones to track progress.

**Regularly Assess Progress**
- Regularly review the effectiveness of implementation and make course corrections as needed.

---

1CAP Goal Leadership (OSTP and DOC) will review and approve the Full Action Plan prior to its implementation.
The CAP goal will be accomplished through five strategic approaches:

- Identify regulatory impediments and administrative improvements in Federal technology transfer policies and practices.
- Increase engagement with private sector technology development experts and investors.
- Build a more entrepreneurial R&D workforce.
- Support innovative tools and services for technology transfer.
- Improve understanding of global science and technology trends and benchmarks.
Summary of Progress

Strategy 1: Regulatory and Administrative Improvements

Strategy 2: Private Sector Engagement

- Army Research Laboratory opened its newest Open Campus hub in April 2018 at the George J. Kostas Research Institute for Homeland Security at Northeastern University, [https://www.arl.army.mil/www/default.cfm?article=3190](https://www.arl.army.mil/www/default.cfm?article=3190)
- DOT Connected Vehicle (CV) Pilot Deployment Program successful joint technology testing demonstrated interoperability with key CV interfaces and standards, [https://www.its.dot.gov/pilots/crosssite_cvp.htm](https://www.its.dot.gov/pilots/crosssite_cvp.htm)
- SBA coordinated 2018 SBIR Road Tour with representatives from 20 Federal agencies, including MBDA and the Federal Lab Consortium, visiting 18 states in 4 regions, with over 2600 attendees, [http://www.sbirroadtour.com/](http://www.sbirroadtour.com/)
- SBA launched two “Train-the-Trainer” courses on helping potential SBIR/STTR applicants and working with first time awardees, with 100+ business service providers participating. In addition, a partnership with USDA trained extension agents at Regional Rural Development Centers to train additional USDA staff and potential SBIR applicants in rural areas.

Strategy 3: Entrepreneurial Workforce

Strategy 4: Tools & Services

- DOE launched the Lab Partnering Service, [https://www.labpartnering.org/](https://www.labpartnering.org/)
- NIH provided in-kind mentoring and support to reduce technology development risk for nearly 250 SBIR/STTR awardees through their Niche Assessment Program and Commercialization Accelerator Program, [https://sbir.nih.gov/tap](https://sbir.nih.gov/tap)

Strategy 5: S&T Trends and Benchmarks

- SBA and Census initiated project to develop platform to evaluate SBIR/STTR awardee company outcomes, completing initial dataset matching.
### Strategy 1: Regulatory & Administrative Improvements

- **Identify regulatory impediments and administrative improvements in Federal technology transfer policies and practices.**

  **Problems Targeted:**
  - Technology transfer legislation was written in the 1980s and needs to be updated for the 21st century.
  - Inconsistent interpretation of law and regulation; inconsistent practices.
  - Inconsistent definition of technology transfer and stakeholder across organizations.
  - Partnerships not entered into due to unnecessary restrictions in policy, regulation, or statute.
  - Leadership, management, or cultural impediments that hinder adoption of best practices.

</thead>
<tbody>
<tr>
<td>Hold kick off event: “Unleashing American Innovation: Lab-to-Market” on April 19, 2018</td>
<td>Q3FY18</td>
<td>Complete</td>
<td>233 registered attendees</td>
<td>DOC, OSTP</td>
<td>Goal leads invite input from senior leadership across government, academia, and industry.</td>
</tr>
<tr>
<td>Publish Request For Information (RFI) and hold public forums to gather input</td>
<td>Q4FY18</td>
<td>Complete</td>
<td>4 Public Forums with 341 registered participants; 104 RFI responses received</td>
<td>NIST</td>
<td>Publish RFI notice in Federal Register and gather input from all concerned parties. Host public meetings for input and visit with well-established organizations in the field.</td>
</tr>
<tr>
<td>Recommend improved practices, policies, and regulatory actions based on input</td>
<td>Q1FY19</td>
<td>On track</td>
<td>Interagency strategy team established to gather and evaluate stakeholder input, and develop recommendations</td>
<td>L2M SC</td>
<td>Analyze input and develop recommendations of improved practices and policies, regulatory actions, and/or requests for legislative changes</td>
</tr>
</tbody>
</table>
Strategy 2: Private Sector Engagement

- **Increase engagement with private sector technology development experts and investors.**
- **Problems Targeted:**
  - The private sector is a critical player in driving investment, but it can be challenging for them to engage with the Federal government.
  - Improved understanding of how federally-funded technologies, knowledge, and capabilities can be made more attractive for private investment, particularly angel and venture capital.
  - Improved systems usability so the private sector can find federally-funded technologies and key information (e.g. development stage, IP status) in their area of interest.
  - Earlier stakeholder engagement along with market-needs analysis for proposed technologies.
  - Increased stakeholder education of how federally-developed technologies and innovations are currently embedded and being used in technologies.

<td>Summarize models for private investment and growth</td>
<td>Q4FY18</td>
<td>On track</td>
<td>Interagency strategy team collecting and evaluating existing models</td>
<td>L2M SC</td>
<td>Examine existing models, including agency foundation and investment mechanisms.</td>
</tr>
<tr>
<td>Identify additional milestones based on stakeholder input</td>
<td>Q1FY19</td>
<td>On track</td>
<td>Interagency strategy team established to gather and evaluate stakeholder input, and develop recommendations</td>
<td>L2M SC</td>
<td>Analyze input and develop recommendations for additional milestones to increase private sector engagement</td>
</tr>
<tr>
<td>Develop recommendations for making federally funded technologies, knowledge, and capabilities more attractive-for private investment</td>
<td>Q4FY19</td>
<td>On track</td>
<td>Not yet started</td>
<td>NIST, GSA</td>
<td>Develop recommendations through Presidential Innovation Fellow’s assessments</td>
</tr>
</tbody>
</table>
### Strategy 3: Entrepreneurial R&D Workforce

- **Build a more entrepreneurial R&D workforce.** Support entrepreneurial education and training to develop the next generation of skilled innovators and entrepreneurs, and enable technology transfer and start-ups.

- **Problems Targeted**
  - The R&D workforce, including researchers and managers, lacks exposure and knowledge about and incentive to take the steps required in translating research from the lab to the marketplace.
  - Conflict-of-Interest or other policies, culture, and processes that inadvertently discourage entrepreneurship or make it difficult to recruit and retain entrepreneurial employees.
  - Attitude and resulting culture created by some R&D leaders that the government should not be involved in the commercialization of technology.

<td>Expand agency participation in R&amp;D entrepreneurial training programs, such as I-Corps</td>
<td>Ongoing</td>
<td>On track</td>
<td>Federal I-Corps Community of Practice transitioning leadership</td>
<td>L2M SC</td>
<td>Increase agency team participation in programs such as I-Corps and Cyclotron Road</td>
</tr>
</tbody>
</table>
Strategy 4: Tech Transfer Tools & Services

- **Support innovative tools and services for technology transfer. Improve and develop tools to support the discovery and transfer of technologies.**
- **Problems Targeted**
  - Complicated bureaucracy for citizens to navigate in order to engage in tech transfer.

<table>
<thead>

<td>Analyze input and develop recommendations for additional milestones for new tools and services that will meet stakeholder needs</td>
</tr>
<tr>
<td>Execute Joint Venture Partnership to develop new tools that enhance use of public and private data supporting technology commercialization.</td>
<td>Q4FY18</td>
<td>On track</td>
<td>N/A</td>
<td>NIST</td>
<td>Execute and begin partnership with NTIS (National Technical Information Service) to engage the private sector to develop tools for efficient utilization of public and private data to enhance technology commercialization efforts</td>
</tr>
<tr>
<td>Gather stakeholder input to refine FLC Business website</td>
<td>Q1FY19</td>
<td>On track</td>
<td>FLC Business is being updated to version 3.0 per user and stakeholder input. Currently in final testing with planned release for this summer.</td>
<td>FLC</td>
<td>Survey agencies and customers to determine priority actions for implementation</td>
</tr>
</tbody>
</table>
Strategy 5: Science and Technology Trends and Benchmarks

- **Improve understanding of global science and technology trends and benchmarks to measure progress and achieve results.**

**Problems Targeted**
- Increased need to demonstrate value of federal research investments to the Nation.
- Designing metrics that take into account the variety of Agency missions and technologies.
- Shifting the focus from outputs to mission-related outcomes.
- Balancing reporting burdens with the ability to measure progress.
