## Summary of Progress

NBIB Reduces Background Investigation Inventory by 18%. Through the implementation of measures approved by the Security Executive Agent (ODNI) and Suitability and Credentialing Executive Agent (OPM) and internal business process improvements, NBIB has now reduced the background investigation inventory from a high of 725,000 in June to 594,000 in December. Reductions are expected to continue as policy changes are implemented.

ODNI Issues Policy Mandating Government-wide Reciprocity of Background Investigations. On November 9<sup>th</sup>, the Security Executive Agent issued policy for the reciprocity of background investigations and national security adjudications. The policy aligns and establishes the requirements for reciprocal acceptance of background investigations and national security adjudications for initial or continued eligibility for access to classified information or eligibility to hold a sensitive position. It will improve mission readiness through an efficient, timely, and effective security clearance process that supports the Federal Government's ability to recruit and mobilize top talent where and when needed.

OPM issues New Training for Suitability and Fitness to Promote Reciprocity. The Suitability Executive Agent (OPM) joined the Department of Defense (DoD) Defense Civilian Personnel Advisory Service **to amend the training objectives of the National Training Standards for Suitability Adjudicators to respond to requests for suitability training that could be offered to fitness and other adjudicators.** After socializing the new training objectives with all stakeholders, OPM used the new standards to reformulate its reimbursable training. In July, OPM began offering a new class, *Fundamentals of Suitability Adjudication for Suitability and Fitness Adjudicators*. Expansion of this offering resulted in more adjudicators being trained in the final quarter than in the previous three quarters combined, promoting reciprocity by increasing the use of like standards across agencies.

NBIB Partners with Customer Agencies and Industry to Create Efficiencies. NBIB has partnered with customer agencies and industry to target high volume geographical areas, centralize investigative workforce, and automate processes. These initiatives have improved efficiencies through a reduced the level of effort to complete investigative elements, such as travel time, and improved the partnerships between the Government and industry to meet a common mission. Additionally, NBIB is in collaboration with the Uniformed Military Services to pilot the Trusted Information Provider (TIP) Program, an initiative aimed at reducing duplication of information previously collected during the recruitment process. When implemented, the TIP Program will further improve the timeliness, efficiency, effectiveness, and cost of a Federal background investigation.
