Improve the Privacy and Security of Data at Institutions of Higher Education (IHEs) through Outreach and Compliance Efforts

Leaders: Jason Gray, Chief Information Officer, Office of the Chief Information Officer and Kathleen Styles, Chief Privacy Officer, Office of Management

Theme: Education, Training, Employment and Social Services
Overview

Goal Statement
- By September 30, 2019, the Department will increase information security program outreach activities to IHEs by 40% in order to help protect federal systems and data privacy and security, and commence audits of IHEs subject to A-133 and Gramm-Leach-Bliley Act (GLBA), resulting in 36 IHEs (from a baseline of zero) completing an audit of GLBA-related information security safeguards with no significant findings.

Challenge
- Available data suggests IHEs are increasingly becoming targets of cyber-attacks and potentially placing ED data and the efficacy of systems and programs at risk;
- Many IHEs do not adequately understand the magnitude of the threat to student data, the actions that need to be taken to protect student privacy, nor the urgency with which the Department views this matter; and
- IHE leadership is not always fully aware of their responsibilities for self-reporting, and therefore, fail to engage with the Department in a timely fashion to self-report and are slow to respond to the Department’s inquiries.

Opportunity
- Significant opportunities for collaboration already exist and can be built upon, including conferences, industry meetings, and agency-initiated trainings.

Goal Structure & Strategies

The Department will achieve this APG through collaborative efforts involving training, outreach, monitoring, and reporting.

- An IHE outreach strategy related to GLBA compliance has been developed and outreach timeline constructed.
- The number of IHEs passing an audit of GLBA-related information security safeguards. Such safeguards including designating responsible individuals to coordinate the security program, obtaining IHE risk assessment, and obtaining the documentation created by the IHE that aligns each safeguard with each risk.*
- Outreach activities carried out by Federal Student Aid (FSA) related to privacy and data security requirements is ongoing.
- Tracking timely privacy and data security reports received by FSA from recipients of outreach activities as a result of FSA’s outreach activities.

*Timing of the issuance of new audit standards for GLBA-related information security safeguards, to be published in the OMB Compliance Supplement, could impact the requirement of IHEs to conduct and submit an audited assessment of data security programs.
In FY18 Q1, FSA built upon the program established in August 2017 to increase awareness of privacy and data security requirements at IHEs, including the timely reporting of data breaches. Key activities included training presentations and workshops to IHEs, responding to questions received on cyber security, and partnering with the Office of the Chief Information Officer, Chief Privacy Office and Office of Postsecondary Education on policies and procedures for IHE reporting.

In FY18 Q1, an outreach strategy related to GLBA compliance was developed and an outreach timeline constructed.

In Q1 and Q2 of Fiscal Year 2018, 9 training sessions were provided privacy and data security requirements to IHEs, their education associations and other target audiences.
Based on the comments provided by the American Institute of Certified Public Accountants (AICPA) and feedback from IHE associations, including EDUCAUSE, ACE and the National Association of Student Financial Aid Administrators, it was proposed to delay the implementation of the GLBA-related audit requirement until the FY19 OMB Compliance Supplement. This strategic pause will also ensure FSA is properly prepared to address the anticipated volume of cases requiring resolution of audit findings. FSA continues with its original plan for inclusion in the OMB Compliance Supplement.

FSA will utilize the remaining period in FY18 to:

1. Provide schools more guidance BEFORE they are audited on this process;
2. Allow schools additional time to prepare to address the identified issues; and
3. Conduct additional FSA-led outreach to schools on what the audit procedures may be.
## Key Milestones

The milestones on the path to achieving this APG include activities around outreach, technical assistance, and monitoring/ tracking.

*Timing of the issuance of new audit standards for GLBA-related information security safeguards, to be published in the OMB Compliance Supplement, could impact the requirement of institutions to conduct and submit an audited assessment of data security programs.
Although the Department has conducted outreach in the past, FY 2018 will be the first year the Department has systematically tracked this type of outreach.

The Department will increase information security program outreach activities to IHEs and commence audits of IHEs, subject to A-133 and Gramm-Leach-Bliley Act (GLBA), completing an audit of GLBA-related information security safeguards.

A baseline of zero for FY17 Q4 represents a new, updated definition of qualifying outreach activities.
Data Accuracy and Reliability

Each metric has a unique data source.

For the audit metric (a) the data source is IHE-provided auditor reports accessed and analyzed by FSA and the Education Privacy Technical Assistance Center (PTAC). Data accuracy will be subject to the limitation of data timeliness – due to input being created from auditor reports.

For outreach metric (b) the activity records maintained by the FSA are on a secure SharePoint site. As each activity is completed by FSA or the Department’s Privacy Technical Assistance Center (PTAC), it will be recorded in the SharePoint site. Data accuracy will be high, reliable and consistent, based on contractor, ED personnel and FSA personnel actions. The SharePoint site has been created and is ready for data input. Limitations include entry error and individual bandwidth.
Additional Information

Contributing Programs
Organizations:
- Institutions of Higher Education (IHE)
- Office of Federal Student Aid
- The Department’s Office of the Chief Information Officer
- The Department of Education's Office of the Chief Privacy Officer

Program Activities:
- Enhanced outreach to higher education institutions
- Audits of GLBA-related information security safeguards at higher education institutions

Regulations:
- OMB Circular A-133 and A-133 Compliance- serves to identify existing important compliance requirements that the Federal Government expects to be considered as part of an audit required by the 1996 Amendments.
- Gramm-Leach-Bliley Act (GLBA) Safeguards Audits check for the following:
  a. Verify that the IHE has designated an individual to coordinate the information security program.
  b. Obtain the IHE risk assessment and verify that it addresses the three required areas noted in GLBA 16 CFR 314.4 (b).
  c. Obtain the documentation created by the IHE that aligns each safeguard with each risk identified from step b above, verifying that the IHE has identified a safeguard for each risk.

Stakeholder Consultation
Stakeholder feedback has included, but is not limited to, the American Institute of Certified Public Accountants (AICPA), EDUCAUSE, ACE, the National Association of Student Financial Aid Administrators and attendees of the Annual FSA Training Conference.
